

Please amend the application as follows:

IN THE CLAIMS:

---

1. (Currently Amended) A molding composition comprising

- A) 40 - 95 parts by weight (in relation to 100 parts by weight of the total composition) of aromatic polycarbonate and/or polyester carbonate
- B) 0—45 10-35 parts by weight (in relation to 100 parts by weight of the total composition) of (co)polymer based on vinyl monomers
- C) 1 - 25 parts by weight (in relation to 100 parts by weight of the total composition) of silicone acrylate graft rubber and
- D) 0.4 - 40 parts by weight (in relation to 100 parts by weight of the total composition) of mineral filler.

B) 2. (Original) The composition according to Claim 1, in which component C is prepared by graft polymerization of aromatic alkenyl compounds and a vinylcyanide onto a composite rubber that contains a polyorganosiloxane rubber component and a polyalkyl(meth)acrylate.

3. (Original) The composition according to Claim 1, wherein component B is a (co)polymer of at least one monomer selected from the group consisting of vinyl aromatics, vinyl cyanides, methacrylic acid-(C<sub>1</sub>-C<sub>8</sub>)-alkyl esters, unsaturated carboxylic acids and derivatives of unsaturated carboxylic acids.

4. (Original) The composition according to Claim 1, wherein component B is a copolymer of

B.1 from 50 to 99 parts by weight (in relation to 100 parts by weight of B) of vinyl aromatics and/or methacrylic acid-(C<sub>1</sub>-C<sub>8</sub>)-alkyl esters and

B.2 from 1 to 50 parts by weight (in relation to 100 parts by weight of B) of

a member selected from the group consisting of vinyl cyanides  
methacrylic acid-(C<sub>1</sub>-C<sub>8</sub>)-alkyl esters, unsaturated carboxylic acids and  
derivatives of unsaturated carboxylic acids.

5. (Currently Amended) The composition according to Claim 1 further  
containing wherein the amount of mineral filler is 1 to 30 parts by weight of a mineral  
filler.

B<sup>1</sup>  
6. (Currently Amended) The composition according to Claim 1 further  
containing wherein the mineral filler is at least one member selected from the group  
consisting of glass fibers, glass spheres, mica, silicates, quartz, talc, titanium  
dioxide and wollastonite.

7. (Original) A method of using the composition according to Claim 1  
comprising molding an article.

8. (Original) The article prepared by the method of Claim 7.

9. (Original) A molded article comprising the composition of Claim 1.

B<sup>2</sup>  
10. (New) The composition of Claim 6 wherein the mineral filler is glass  
fibers.
